Project: Aim Fitness Center – Offline Gym Management System

1. Project Overview

Project Name: Aim Fitness Center – Offline Gym Management System

Client Name: Aim Fitness Center

Business Problem: The gym currently maintains member records, attendance, trainer allocation and memberships manually, which leads to duplicate records, delayed reporting and difficulty tracking active members.

Project Objective: Develop a 100% offline desktop application that manages members, trainers, memberships, attendance, workout plans and reports using a local database without requiring an internet connection.

2. Stakeholders

- Business Owner – Reviews reports and business performance.
- Gym Manager – Oversees day-to-day operations.
- Receptionist – Registers members and manages memberships.
- Trainers – Create workout plans and monitor progress.
- Members – Receive fitness services.
- Administrator – Maintains the application and local database.

3. Business Requirements

- Register new members.
- Maintain member profiles.
- Manage membership plans and renewals.
- Record daily attendance.
- Generate daily, weekly and monthly reports.
- Backup and restore data locally.

4. Functional Requirements

FR-01 User Login

FR-02 Member Registration

FR-03 Membership Management

FR-04 Membership Renewal

FR-05 Attendance Tracking

FR-06 Trainer Management

FR-07 Workout Plan Management

FR-08 Reports & Dashboard

FR-09 Local Backup & Restore

5. Non-Functional Requirements

- Works completely offline.
- Desktop application for Windows.
- Local database storage.
- Secure authentication.
- Easy-to-use interface.
- Fast response time (<3 seconds).
- Daily local backup.

6. Assumptions

- The application runs on a Windows computer.
- Staff members are trained to use the software.
- One computer is sufficient for daily operations.
- Internet is NOT required.

7. Constraints

- Desktop-only application.
- Single local database.
- No online payment gateway.
- No cloud synchronization.
